

## A letter to the future

---

Imagine the future, when this time capsule is opened. In it is a letter that your future self wrote to your current self.

Who do you hope you are?

Who do you want to become?

What advice would you give yourself to help along the way?

OR

Write a letter to each child, telling them about your hopes and wishes for their future.

OR

Kids are often the most resilient of us all. Tell them about who you have seen them become during the pandemic...how they have grown and changed. What you've most appreciated and admired.
